

**Lo Cascio Originals "Coffee Clutch Junction"
N Gauge Trolley Layout.**

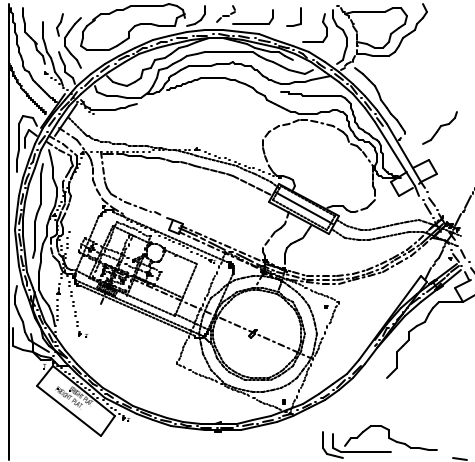

People have been fascinated with miniature railroads for many years and large layouts still draw crowds from around the country. But few people could afford the time and space to create even a small railroad in their home. This layout is unique in that it was designed to be built without extensive technical skills and still be interesting with its track layout and scene possibilities. Its modular design allows for expansion of scenery and structures without major change to construction. All the planning has been done for you and the full size drawing lets you "preset" scenery and structures before actually placing them permanently on the layout. The streets can also be modified easily to suit different structure requirements. The wiring uses CirKit tapes and all connections are shown on the layout.

The Coffee Clutch Junction Railroad was carefully designed with minimum track radius in order to be small enough (22" x 42") to be stored anywhere! In fact, there are separate plans available for a beautiful Queen Anne Coffee Table "Designed Specifically for this Layout"! I tried to create an interesting layout with realistic roads and hills and even a covered bridge (plans included). You can create any season you want, summer, winter, spring or fall. There are several kits that you can add to your layout, an OPERATING SAW MILL KIT, complete with boat (summer) or ice skaters (winter). There are also LIGHTED TELEPHONE POLES and BUILDING STRUCTURES available. I have enclosed a list of recommended Trolleys that can be used on your layout. You can use other types of trains but keep in mind the limited radius of the track. You could ask your dealer to run the train on the 9-1/4" inside radius track before you buy it. The Coffee Clutch Junction will provide enjoyment for young and old for many years to come and will likely become the topic of conversation with your friends.

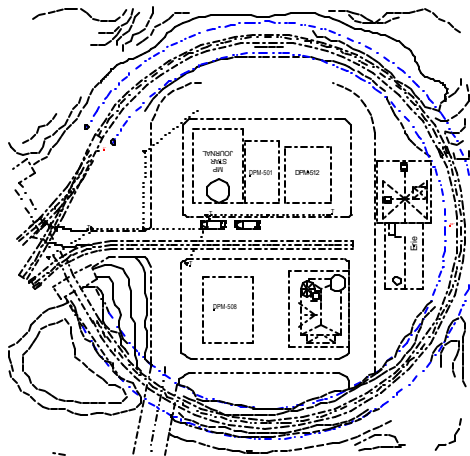

Warren Lo Cascio

Here's what the finished layout looks like!

Working Lumber Mill Area

Town area with DPM lighted Interiors in the Buildings

DPM Lighted Interiors

includes: Foldup Interior
Window Treatments

Interior Figures and Accessories
Fiber Optic Lighting Module
